1 Takumi (拓海) と Ali (アリ) の会話文を読んで、表 A の ( ① ) ~ ( ③ ) に適切な国を [ Japan/France/China/Poland ] から選んで答えなさい。

Ali: What are you doing, Takumi?

Takumi: I'm researching popular jobs. I'm going to give a presentation about a profession in class tomorrow. What do you want to be in the future, Ali?

Ali: I want to be a PC programmer. In India, it is a very popular job.

Takumi: It seems so. Looking at this chart, it seems that it is popular in the U.S. and Poland too. Overall, being a doctor and nurse is the most popular.

Ali: In Europe, veterinarians are in the ranking, because of the livestock industry.

Takumi: That's right. But in Poland, the number 1 is a different one. This is also in the ranking in Japan.

Ali: I like YouTube too, but I would like to be a programmer or an engineer for a job. I don't see either of them on the list in Japan.

Takumi: Yes, they are. Computers are used in many places in Japan, so why aren't they popular? I'll do some more research on this.

2 Takumi (拓海) が IT エンジニアについて発表したプレゼンテーションの原稿を読んで、以下の問いに答えなさい。

Hello everyone. I would like to talk about IT engineers. Can you imagine your life without IT? How many IT systems do you use from the time you wake up in the morning until you go to bed? Probably all of us have benefited from them. As ① this table shows, the number of IT engineers supporting society is especially large in developed countries, and their number in Japan is among the highest in the world. So, throughout the world, computer programmers and engineers are popular jobs for children. However, look at this chart. Only in Japan are these professions less popular. Why is it that this profession, which enriches our lives and is \*indispensable, is not popular? Look at ② this table. You can see the reasons for this lack of popularity. This is not popular because \_\_\_\_\_ ( ③ ) \_\_\_\_\_.

For this reason, it seems that more talented Japanese engineers are finding \*employment overseas. We believe it is necessary to improve the working environment for them to protect the safety and convenience of Japanese society.

Thank you for listening.

(注) indispensable 絶対必要な employment 雇用

(1) ①②の this table が示す表を A ~ C から選んで記号で答えなさい。

(2) プレゼンテーションの内容に合う文になるように③に適切な英語を答えなさい。答えは2文以上になっても構いません。

4 次の英文を読み、1～6の問いに答えなさい。

What animal do you like the best? In a study, a team from the United States and France \*conducted online surveys, zoo sites, animated films and school questionnaires to find which animals were popular. The research paper was \*published in the U.S. The research team used these \*sources to make a list of the top 10 species. The top 10 animals are tigers, lions, ( ① ), giraffes, \*leopards, ( ② ), cheetahs, polar bears, \*gray wolves and gorillas. Symbolic animals such as ( ① ), lions and giant ( ② ) appear everywhere in movies, books and toys. However, ③ the study found that while these animals are very popular, most people don't know they are in danger.

The complete loss of one species of animal or plant is called “extinction.” Of course, no one can dream of these popular animals going extinct, but we all should know what is happening on the earth right now.

We know that about 1,750,000 species of animals and plants are living on this planet. According to the IUCN Red List in 2019, more than 30,000 species of animals are in danger of extinction. They \*include gorillas which are facing a lot of challenges and *medaka* which lived in many rivers and ponds when your mothers and fathers were children.

Why are gorillas also on the Red List? According to a study, the main \*causes of extinction are \*poaching, logging, and \*infectious disease. Another big cause comes from mining. We need \*cobalt to make electronic devices such as cell phones, \*laptops and game consoles. One thing that can be said is that human beings are very much \*involved in the \*crisis.

When we think of gorillas, try to focus on the fact that they are now endangered and that many other wild animals are in danger as well. If extinction continues, it will affect lots of other animals. We should take an interest in various living things and study about them. For humans, other animals and plants are our friends living together on the earth. Let's think about what we can do and act. Knowledge about extinction is going to protect and enrich our lives.

Meg: I have never thought of endangered animals before this class.

Ken: Me neither.

Meg: I learned that the IUCN Red List teaches us important things about endangered animals, plants, and so on.

Ken: That's right. I think people must make strict rules for hunting gorillas.

What else can you do to protect them?

Meg:
